

Color Template for Surface AR

<https://www.youtube.com/embed/U4q8132fjxw>

Do you want to display your 3D product with various colors? Then you can do it with Marvin XR.

Here's an easy way to achieve it with our new **Color Template**.

1. Open your Surface AR campaign card and go to **Web Editor** menu and click on **Edit**.
2. Remove comment tag (yellow marked area) by removing (<!-- comment tag in HTML -->) this syntax.
3. There are three color palette buttons by default. Change the color of them by putting Hex color code ([HTML color codes](#)).
4. If you want to add more color buttons to your Surface AR campaign - follow the instructions (marked with red).
