

License

License is essentially your business overview of AR portfolio management.

Your **subscription plan** is based one two things:

- 1. How many AR campaigns you can create and
- 2. How many AR views (while your audience view AR campaigns) you receive every month

License menu shows both the information. Your view count gets reset at the beginning of every month.

Apart from that, of course, it shows the current License status of your account.

Total AR Campaigns
22

Views (Current Month)
