

Rebranding Surface AR Campaign

Everything You Need To Know About WebAR Rebranding 📖

Change Page Title

Open your Surface AR campaign and go to Web Editor and click on the Edit button.

Find the **<title>** tag in the beginning of the page. Update your page name between the tags and Save.

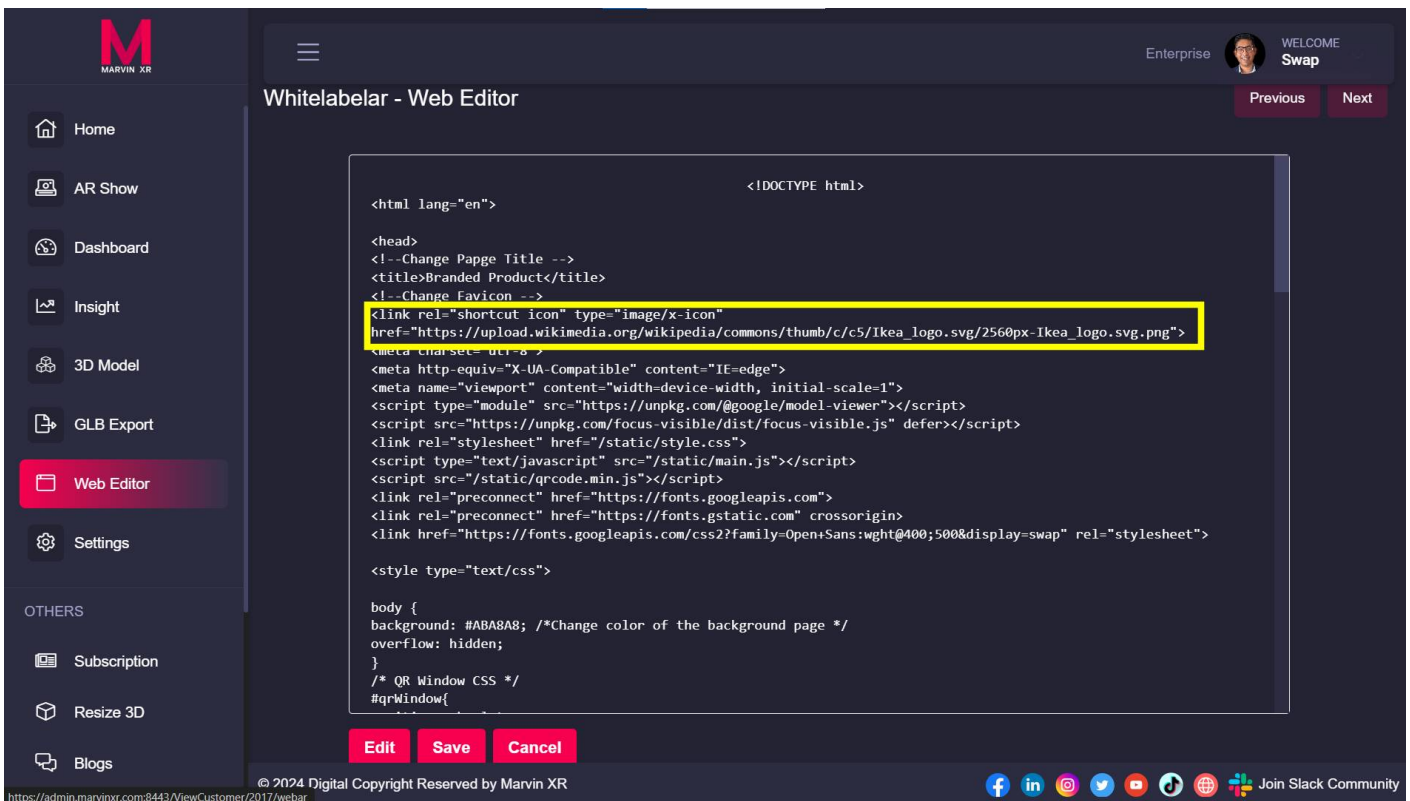

<title>Your Page Name</title>

The screenshot shows the Marvin XR Web Editor interface. On the left is a dark sidebar with navigation icons and labels: Home, AR Show, Dashboard, Insight, 3D Model, GLB Export, Web Editor (highlighted in red), and Settings. Below these are 'OTHERS' options: Subscription, Resize 3D, and Blogs. The main area is titled 'Whitelabelar - Web Editor' and contains a code editor with HTML code. The code includes a title tag set to 'Branded Product' (highlighted in yellow), a link tag for a shortcut icon, a meta charset tag, a meta viewport tag, a script tag for a model viewer, a script tag for focus-visible.js, a link tag for a stylesheet, a script tag for main.js, a script tag for qrcode.min.js, a link tag for preconnect to fonts.googleapis.com, and a link tag for a font family. At the bottom of the code editor are 'Edit', 'Save', and 'Cancel' buttons. The footer of the interface includes a copyright notice '© 2024 Digital Copyright Reserved by Marvin XR' and social media icons with a 'Join Slack Community' link.

Change Page Favicon (URL icon)

Find the comment **Change Favicon** and update the following **<link>** tag. Paste the address of the new favicon (must be a PNG file) link address to the **href** value and Save.

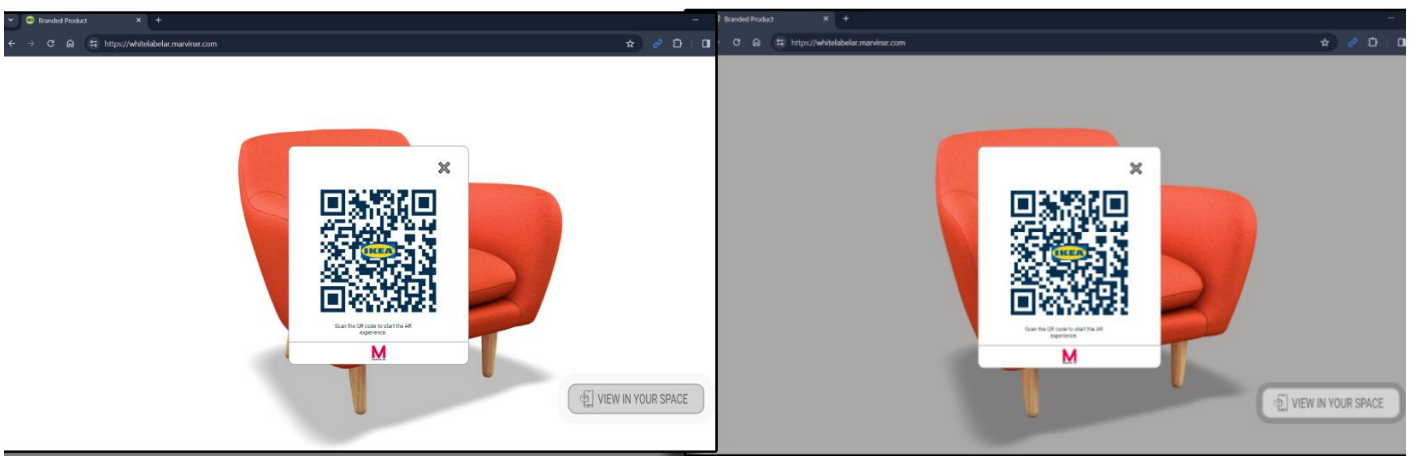

<link rel="shortcut icon" type="image/x-icon" href="Insert PNG image file address">

Change Background Color

Find the comment in the CSS, the following comment - `/*Change color of the background page */`
 Change the default hex color code for background and Save. Find color hex codes from [here](#).

background: #ABA8A8;

Change QR Window Size

If you want to change the default QR popup window default sizing, please change value next to the following comments: /* QR Window CSS */

To change popup window width - change the values next to /*Change QR window width*/

To change popup window height- change the values next to /*Change QR window height*/

```
#qrWindow{
position: absolute;
margin:auto;
background: rgb(255,255,255);
width: 100vmin; /*Change QR window width*/
max-width: 330px;
height: 100vmin; /*Change QR window height*/
max-height: 400px;
left: 50%;
top: 50%;
transform: translateX(-50%) translateY(-50%);
z-index: 10000;
border: solid 1px gray;
border-radius: 3%;
}
```

Change Logo in QR Code

This is quite easy. Simply follow this existing tutorial to **change logo in QR code**.
